

FEATURES

- O-Ring Mount
- -40°C to +125°C Operating
- Temperature Range
- Up to ±0.1% Pressure Non-Linearity
- 1.0% Interchangeable Span
- (provided by gain set resistor)
- Solid State Reliability

APPLICATIONS

- Medical Instruments
- Process Control
- Fresh & Waste Water Measurements
- Refrigeration/Compressors
- Pressure Transmitters
- Hydraulic Controls

154N

Compensated

SPECIFICATIONS

- 316L SS Pressure Sensor
- 19mm Diameter Package
- 0 100mV Output
- Absolute and Gage
- Temperature Compensated

The 154N compensated is a 19 mm small profile, media compatible, piezoresistive silicon pressure sensor packaged in a 316L stainless steel housing. The 154N compensated is designed for O-ring mounting and OEM applications where compatibility with corrosive media is required.

The sensing package utilizes silicone oil to transfer pressure from the 316L stainless steel diaphragm to the sensing element. A ceramic substrate is attached to the package that contains laser-trimmed resistors for temperature compensation and offset correction. An additional laser-trimmed resistor is included which can be used to adjust an external differential amplifier and provide span interchangeability to within $\pm 1\%$.

Please refer to the 154N uncompensated and constant voltage datasheets for more information on different features of the 154N.

PERFORMANCE SPECIFICATIONS

Unless otherwise specified: Supply Current: 1.5mA, Ambient Temperature: 25°C

DADAMETERO		≤005PSI			≥015PSI		LINUTO	
PARAMETERS	MIN	TYP	MAX	MIN	TYP	MAX	UNITS	NOTES

Notes

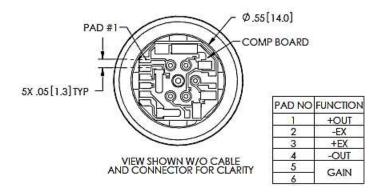

- 1. For amplified output circuits, 3.012V ±1% interchangeability with gain set resistor. See application schematic.
- Measured at vacuum for absolute (A), ambient for gage (G).
- 3. Best fit straight line.
- Over the compensated temperature range with respect to 25°C.
- 5. Guarantees output/input ratiometricity.
- Load resistance to reduce measurement errors due to output loading.
- 7. Between case and sensing element.
- The maximum pressure that can be applied to a transducer without rupture of either the sensing element or transducer. 8.
- Maximum temperature range for product with standard cable and connector is -20°C to +105°C.
- Standard gage units are not recommended for vacuum applications. For vacuum applications below 1/2 atmosphere, consult factory.
- 11. Device Marking:
 - Each part shall be identified with Model Number, Pressure Range, Type, Lot Number, Serial Number and Date Code.
- 12. Shipping/Packaging:
 - The stainless steel diaphragm is protected by a plastic cap. Each unit will be packaged individually in a plastic vial with anti-static foam.
